

Morrison makes it easy to install narrowed rear end and wide tires with this factory-welded Ladder Bar rear suspension subframe assembly. The "clip" includes mandrel-bent rear frame rails, crossmembers and suspension mounts. Each clip is assembled on a special fixture to assure proper alignment and welded by certified professionals. Most importantly, each "clip" is custom designed and built for the intended application using contemporary CAD technology. This assures a perfect fit and eliminates the extra fabrication required to install "universal" type assemblies as sold by our competition. Over the years Art Morrison Enterprises has designed and built rear suspension clips for a wide variety of vehicles. Dozens and dozens of popular applications (and some quite unusual) are maintained in Morrison's data server, and can be promptly accessed to initiate building a clip for your year/make/model car or truck.

What's more, only Morrison gives you the choice of using 2"x3" or 2"x4" rectangular tubing. You also have a choice of a dropped crossmember or the highly effective "donut" style combination cross-member and driveshaft loop in 2"x3" rails.

For a racing or "Pro Street" application you'll probably want to go with the 2"x3" clip. It's a third lighter than the beefier 2"x4" models, and provides all the rigidity you'll

Competition & Street Ladder Bar Packages

Our Ladder Bar Packages include our Double Adjustable Ladder Bar Kit, cross-member tube with brackets, axle housing mounts, spring mounts, our Morrison spring kit with adjustable shocks and rate matched springs.

The Competition Package includes 4140 solid rod ends and diagonal link kit. Prices start at **\$595.00**.

Our Street Package uses poly-bushed stainless rod ends for a quieter ride and a Panhard bar kit. Prices start at **\$650.00**.

need when roll cages and subframe connectors are employed. As a rule of thumb, the more rigid the chassis, the better it will work. The 2"x4" clips are perfect for use in street rod and truck applications, where roll bars and cages are not typically used. Here, the extra strength of the larger frame rails come into play.

DeLuxe Double Adjustable Ladder Bars

Morrison Double Adjustable Ladder Bars are made from only the finest quality 1" O.D.x.156" wall D.O.M. seamless carbon steel tubing; rated at 80,000 psi tensile strength. Our list of features speak for themselves.

Our Ladder Bars are available in 30" and 32" lengths, measured from centerline of front pivot to centerline of axle housing. We offer our Ladder Bars bare or with combinations of standard 4140 solid rod ends, polyurethane-bushed stainless steel rod ends, or heavy-duty 4130 rod ends.

The Morrison "double adjustable" bars have a quick-adjust mechanism on the lower bar.
